WEVER & DUCRÉ
LIGHTING

PRESSKIT LIGHT + BUILDING 2024

Tune up

MARCH 3 - 8 | HALL 5.1 | BOOTH B50

Do you love the extraordinary? And do you want lighting with exciting designs, endless application possibilities, and super-easy installation? The new Wever & Ducré collection is the answer to your search for change: Each light is a highlight in its own right. Whether solo or in combination, they bathe rooms in a completely new, exciting light. Time for some reinvention. Time for a bold makeover. Tune up your light ... and life!

New products

Lets *twist* again

LECA

Small, round, and so discreet that you only notice it at second glance – that's LECA, a Scandinavian-inspired aluminium light that blends seamlessly into modern interiors. It can be swivelled both vertically and horizontally and perfectly highlights pictures, plants, or your favourite spot in the living room. If you want to illuminate larger areas such as meeting rooms or lobbies, LECA can also be used as a multi-spotlight to create a particularly harmonious ambience. Thanks to a special honeycomb louver, the intensity of the light can if wanted be adjusted. LECA is available as a surface-mounted or recessed light and in three different colours.

A *classy* touch

FINELLE

With its simple, linear shape, FINELLE looks like a modern installation that floats weightlessly in the room. Its tubular glass body is interspersed with fine grooves on the inside, creating particularly beautiful visual effects. The aluminium suspension is available in matt black or white and in a delicate champagne shade. It emphasises the minimalist design of the light, which is perfect for private living and dining areas as well as modern offices or shops.

A *true gem*

PERLEZ IP44

The goddess Venus would be delighted: PERLEZ IP44 illuminates bathrooms, spas, etc. like a shimmering pearl. Available in three sizes, the light is a perfect symbiosis of functionality and decoration. Whether discreetly mounted on the ceiling or as an eye-catching clip on the mirror, PERLEZ IP44's opal glass is ideally protected against splashing water and simultaneously creates a gentle, relaxing atmosphere for body and soul.

Let light *follow* you

PERLEZ SPIN + GRID

What else will PERLEZ surprise you with? With SPIN and GRID, two unusual mounting variants that allow the light to be positioned completely independently of the power outlet. Do you want to flexibly adapt your lighting to any situation? SPIN's swivelling arms make this possible in just one movement. To illuminate larger areas, such as a living room, PERLEZ is best combined with GRID, allowing four of the beautifully designed lights to shine from the ceiling.

New products

Your new *book club* member

MATCH FLOOR

Good news for all those who find it hard to put down their favourite book: MATCH Floor can keep up with any reading marathon. The slim free-standing light provides glare-free light and can be flexibly adjusted thanks to the swivelling spot. With its minimalist design and a standing height of 1.2 m, it blends seamlessly into many interiors and changes light intensity in just one movement. This is made possible by the integrated dimmer in the base.

Almost *invisible*

FINLIN FLOOR

How far can form be reduced? Quite far, our designers think, and with FINLIN Floor they have developed a light that you deliberately only notice at second glance. With its quiet elegance, it stays discreetly in the background and directs the focus to other things. Despite its slim shape, the light, which is available in white or black, is robust and can be swivelled up to 10 degrees. It provides particularly soft, indirect light and is the perfect partner for other minimalist lights such as MATCH Floor.

The *shape* of nature

REED

REED's biomorphic shape is reminiscent of long, slender reeds and blends in perfectly with its natural surroundings. It discreetly draws the eye to paths, sculptures, and other striking landscape features, and can be securely anchored to the ground with a spike. Thanks to its IP65 protection class, it is particularly resistant and securely protected against dust and rain. Perfect for gardens or parks, which it can illuminate in two lengths and two colours. By the way: If you want to connect several lights at once, no problem. It is foreseen for our 24 Volt Plug & Play system with just a single driver.

Look at the *flowers*

GEO

Spotlights emphasise what is important – even outdoors. That's why GEO IP65 can be used to emphasise paths or driveways, and also small exotic trees, sculptures, or architectural features. And all this in a remarkably simple way. The dust- and rain-resistant spotlight can be flexibly swivelled and securely anchored to the ground with a spike. This makes it the ideal tool for dramatic, beautiful lighting effects. Whether in matt bronze or anthracite. A quick tip: If you want to connect several lights, then you will be happy to know that this light is using our 24 Volt Plug & Play system that only requires a single driver.

New products

POLA lights your way

POLA

POLA sets the perfect scene for gardens, driveways, or paths, ensuring safe and glare-free illumination of outdoor areas at night. Thanks to its slim, minimalist shape and subtle colour selection, it blends quietly into the landscape and can be positioned with a ground fixation plate or flexibly with a spike. This means that spontaneous parties, summer festivals, or weddings can also be illuminated simply and effectively. POLA is available in two lengths and two colours and can also be combined with several lights via our 24 Volt Plug & Play system. And all with just one driver.

EXCITING BELGIAN DESIGN LIGHTING FOR EVERYONE, DELIVERED FAST.

We all know it, the famous glimpse at the ceiling during which you think: “Well, everyone really does have that light.” That’s why we strive to achieve lighting solutions that first and foremost fit the description: unique. Who inspires us in the process? People like you, who share our enthusiasm for beautiful things and attach as much importance to noble design as to high-quality workmanship. Does it sound passionate? Well, that’s what it is. After all, life is simply far too short for boring lighting.

OUR HERITAGE STORY

From *Belgium* with love

Every story has to have a beginning. Ours begins in the early eighties, when a handful of young Belgians decide to start a new lighting company. So far, so good. Yet what name should the company be given? Since several official languages are spoken in Belgium – including Flemish and French – there was only one choice: The name would need to be equally at home in both worlds, phonetically. Then, by chance, a document fell into the hands of the company’s founders: a little guide to a successful life. His advice: hard work (“WERklust”), trust (“VERtrouwen”), and enthusiasm (“ENThousiasme”), but also courage (“DUrf”) and a good dose of creativity (“CREativiteit”). Today, these five points still constitute our company philosophy.
